Welcome to the first „Diagnostics-4-Future Conference“, an international meeting-place for users and providers from the diagnostic and adjacent fields.

Addressing stakeholders from around Europe, the event brings together industry, medicine and science to find new ways making modern diagnostics compatible with clinical routine. The focus is on solutions to improve the efficiency of health care in regional hospitals and medical centres. A magnificent atmosphere is offered: Located on a small island close to the shores of Lake Constance, the Steigenberger Inselhotel, a former Dominican monastery, provides all amenities you would expect, and promises to make your attendance as enjoyable as it is successful.

Prof. Dr. Klaus P. Schäfer Chair of the program committee & board member BioLAGO – the health network
